PROFILE

I am a self-driven Full Stack Engineer with over 2 years of experience in developing and optimizing applications. I possess hands-on expertise in both front-end and back-end development, focusing on building efficient, scalable, and maintainable systems. I am dedicated to continuously improving performance and enhancing user experience. Additionally, I have strong experience in integrating third-party services and managing infrastructure to ensure seamless application functionality.

Core Technical Skills

■ Frontend Development

- **Html, CSS, Bootstrap, Tailwind CSS, React Bootstrap, Material-UI, Materialize, Chakra**
- **JavaScript, TypeScript, jQuery, Ajax**
- **React JS, React Hooks, Context API, Redux**
- **Fetch API, Axios, RESTful API's, React Query**
- **Cloudinary**
- **Responsive Web Design**

■ Backend Development

- **Express JS**
- **RESTful APIs**
- **MVC**
- **Authentication (JWT)**
- **Postman, Thunder Client, Swagger**

■ Database Management

- **MongoDB, Mongoose**
- **SQL Database**
- **Database Design and Optimization**

Project Management & Version Control

- **Agile Methodology**
- **Notion**
- **Git**

Extras

- React Native
- Native Base
- Aws
- S3
- WebSockets, Socket.io
- Third-Party APIs
- Progressive Web Apps (PWA)
- AWS, S3 Bucket, Server-Side Rendering with EJS
- Web Security
- Adobe Photoshop & Adobe Illustrator
- Documentation

Soft Skills

- Strong Problem-Solving Skills
- Effective Communication and Collaboration
- Mentorship and Knowledge Sharing
- Time Management and Multitasking

Experience

MERN Developer | DevMarkaz

Mar, 2024-Present

[Lahore, Pakistan]

- Working as two-person development team directly serving a UK client for an enterprise web application.
- Primarily focused on front-end development using React.js, Tailwind CSS, and Redux for state management, with some modules utilizing Redux Persist for efficient state persistence.
- Integrated critical functionalities such as RESTful APIs, Google API, Web Socket, Payment Gateway, and Notification API.
- Focused on delivering high-performance, optimized user interfaces by implementing best practices and modern approaches in web development.
- Developed and maintained scalable components for the enterprise-level application, ensuring high standards in usability, performance, and cross-browser compatibility.
- Proactively solved complex challenges, improving application performance, and enhancing user experience.
- Occasionally contributed to backend development and collaborated on database design for some of the modules

Flutter Trainee | CHI

Jan, 2024 - Feb, 2024

[Islamabad, Pakistan]

- Completed a one-month intensive training in Flutter at CHI, NSTP, NUST, Islamabad, focusing on mobile app development.
- Built hands-on projects, learning state management, widget creation, and API integration within Flutter.
- Strengthened understanding of cross-platform mobile development and best practices in UI/UX design for mobile apps.
- Applied the principles of Dart programming and gained practical experience with Flutter's development environment.

MERN Developer | P2P Clouds

Jun, 2023 - Dec, 2023

[Lahore, Pakistan]

- Developed an advanced POS mobile app in React Native, targeted for factories and restaurants.
- Designed and implemented the complete backend for both mobile and web apps.
- Collaborated with a team of 3 developers to build an efficient and scalable front-end.
- Created a comprehensive admin dashboard with user management, role-based access control, activity tracking, and inventory management.
- Ensured best practices were followed for performance and maintainability, enabling receipt generation and user activity tracking.

Web Developer | Digital Message Communication

Jan, 2022 - Feb, 2023

[Lahore, Pakistan]

- Started as a paid intern (September 2021 – February 2022), transitioning into a full-time Developer role.
- Gained hands-on experience developing front-end and contributed to various client projects.
- Collaborated with the development team to deliver high-quality, scalable web applications.
